123BM01 – General laboratory rules and safety requirements

1. Students are required to prepare for each laboratory class by reading the assigned tasks in advance. Their preparation may be checked. They must bring paper, a pen, and a calculator. They may use forms downloaded from the faculty website, as well as laptops and tablets.
2. Students are required to leave coats and large bags in the cloakroom by the main entrance before entering the laboratory.
3. Students are required to wear suitable clothing for practical work. Some tasks may stain clothing.
4. Only authorized persons are permitted to enter the laboratory.
5. Students must obtain the teacher's permission before handling equipment or specimens or switching instruments on or off. Benches, equipment, and windowsills must be kept clear and must not be used as seats.
6. Food and drinks are not permitted in the laboratory. Smoking is prohibited throughout the university building.
7. Students are required to clean their work area at the end of each class, following the teacher's instructions. Hands must be dry before touching electrical equipment. Leftover cement mortar must be placed in the designated waste container and must not be disposed of in the sink.
8. Students are required to follow the laboratory rules and the teacher's instructions throughout the class. Students who arrive unprepared or fail to follow the rules may lose marks or be required to leave the class.
